

# COVID-19 Population Survey: How informed are we?

Coronavirus disease (COVID-19) is an infectious disease caused by the newly discovered coronavirus - SARS-Cov-2. It emerged in December 2019, in China, and quickly expanded around the world.

With this survey, we pretend to appreciate the familiarity of the population about COVID-19 and the impact of this pandemic on their social life.

The researchers responsible for this survey are Olga Cristina Pereira Pires ([olga.pires@hb.min-saude.pt](mailto:olga.pires@hb.min-saude.pt)) and Ana Isabel Andrade Oliveira ([ana.i.oliveira@hb.min-saude.pt](mailto:ana.i.oliveira@hb.min-saude.pt)), Medical Doctors in Hospital de Braga, Portugal. Alexandre Carvalho and Joana Alves are the supervisors of this project.

Your participation in this project is voluntary and consists of answering this survey. You can stop your collaboration in this project at any moment, for any reason.

The expected maximum time for completing this questionnaire is 10 minutes.

This survey can only be completed by people over 18 years old.

The collected data will be coded and treated collectively, guaranteeing the anonymity of the participants.

By proceeding you declare that you agree with the conditions described above.

We are available for any further clarification about this study.
