

Appendix 3

General support measures

<i>General support measures</i>
Reducing external stimuli in the room (reducing light and noise, limiting visitors);
Group nursing care (hygiene, positioning, aspiration of secretions);
Grouping medical and nursing assessments;
Repositioning medical devices;
Treatment of hyperthermia;
Avoidance of neuroleptic medication (e.g. Haloperidol);
Water and nutritional reinforcement;
Assessment of the presence of skin lesions;
Treatment of constipation and urinary retention;
Repositioning and physiotherapy.
